The Company's auditors have not reviewed these condensed interim consolidated financial statements for the nine month period ended June 30, 2016.

Management's responsibility for financial reporting

Under National instrument 51-102, Part 4, subsection 4.3(3) (a), if an auditor has not performed a review of the condensed interim consolidated financial statements; they must be accompanied by a notice indicating that the financial statements have not been reviewed by an auditor. The condensed interim unaudited consolidated financial statements and other information in this report were prepared by the management of **Cerro Grande Mining Corporation**, reviewed by the Audit Committee of the Board of Directors and approved by the Board of Directors. The Company's independent auditors have not performed a review of these financial statements in accordance with the standards established by the Canadian Institute of Chartered Accountants for a review of interim financial statements.

Management is responsible for the preparation of the condensed interim consolidated financial statements and believes that they fairly represent the Company's financial position and the results of its operations, in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

Management has included amounts in the Company's condensed interim consolidated financial statements based on estimates, judgments and policies that it believes reasonable under the circumstances.

To discharge its responsibilities for financial reporting and for the safeguarding of assets, management believes that it has established appropriate systems of internal accounting control, which provide reasonable assurance, at appropriate cost, that the assets are maintained and accounted for in accordance with its policies and that transactions are recorded accurately on the Company's books and records.

Cerro Grande Mining Corporation
Notes to the Consolidated Financial Statements
For the Nine Months Ended June 30, 2016

(Expressed in thousands of U.S. dollars, except share and per share amounts)

1. Nature of the Company and Going concern assumption

Cerro Grande Mining Corporation (the Company or CEG) and its subsidiaries is a mining, exploration and development company which produces gold, silver and copper, with operations mainly in Chile. The Company was incorporated under the Canada Business Corporations Act, and its Common Shares are listed on the Canadian Securities Exchange (“CSE”) trading under the symbol “CEG” and on the OTCQB trading under the symbol CEGMF. The Company is domiciled in Canada and the address of its records office is 1 King Street West, Suite 4009 Toronto Ontario M5H 1A1, Canada. The registered office is Royal Bank Plaza, South Tower, 200 Bay Street Suite 3800, Toronto, ON M5J 2Z4, Canada.

The company's only significant subsidiary is Compañía Minera Pimentón (Pimentón).

These consolidated financial statements have been prepared on a “going concern” basis which contemplates that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. As at June 30, 2016, the Company has a negative working capital of \$7,746 (September 30, 2015 – negative \$8,200).

While the Company has operations generating revenue it continues to be reliant on financing from related parties to finance its operations and working capital. While the Company continues to seek to reduce operating costs, the certainty of future profitability expectations and availability of sources of additional financing if required in the future cannot be assured at this time and accordingly, these material uncertainties cast significant doubt about the Company's ability to continue as a going concern. The consolidated financial statements do not include adjustments to the carrying values and classifications of recorded assets and liabilities and related revenues and expenses that would be necessary should the Company be unable to continue as a going concern and those adjustments may be material.

2. Basis of presentation

a. Statements of compliance

These unaudited condensed interim consolidated financial statements are expressed in thousands of US dollars and have been prepared in compliance with International Financial Reporting Standards (“IFRS”) as issued by the International Standards Board (“IASB”) including IAS34 Interim Financial Reporting. The condensed interim consolidated financial statements should be read in conjunction with the Company's annual consolidated financial statements for the year ended September 30, 2015 which have been prepared in accordance with IFRS as issued by the IASB.

The accounting policies and the application adopted are consistent with those disclosed in Note 3 to the Company's consolidated financial statements for the year ended September 30, 2015 except as described below.

The preparation of condensed interim consolidated financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities and expenses.

Cerro Grande Mining Corporation
Notes to the Consolidated Financial Statements
For the Nine Months Ended June 30, 2016

(Expressed in thousands of U.S. dollars, except share and per share amounts)

All financial information presented in USD has been rounded to the nearest thousand unless otherwise stated.

These condensed interim consolidated financial statements were approved by the Board of Director on August 29, 2016.

b. *Use of estimates and judgments*

The preparation of the condensed interim consolidated financial statements in conformity with IFRS requires the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the condensed interim consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. The Company also makes estimates and assumptions concerning the future. The determination of estimates requires the exercise of judgment based on various assumptions and other factors such as historical experience and current and expected economic conditions. Actual results could differ from those estimates.

The more significant areas requiring the use of management estimates and assumptions relate to future cash flow estimates for asset impairments/reversals, any asset retirement obligation, estimation of useful lives of mining properties, plant and equipment, stock-based compensation and the provision for income taxes and composition of future income tax assets and liabilities. These estimates and judgments have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the financial period.

Estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Mineral resources and reserves estimates are used in the calculation of impairment estimation, amortization and forecasting the timing and payment of close down, restoration costs and clean-up costs.

* The Company leases equipment and vehicles under finance lease contracts. As of June 30, 2016 the net book values of leased equipment and vehicles were \$nil and \$nil (2015- \$164 and \$59) respectively, as all lease contract have reached their due date. During the nine month period ended June 30, 2016, the Company did not acquire equipment under finance leases. All leases provide the Company with the option to buy the equipment at a beneficial price – these options were taken and the equipment and vehicles now form part of the Company's fixed assets.

** Non-current assets are tested for impairment when events or changes in circumstance suggest that the carrying amount may not be recoverable. During the year ended September 30, 2015 the Company has recorded an impairment charge of \$ 6,556 related to the Pimenton project, primarily as a result of the decrease in the grade and future gold and copper prices. The recoverable amount was calculated using the value-in-use method, which is the expected present value of future cash flows from the asset, using a pre-tax discounted rate of 7.9%. The remaining \$181 impairment charge relates to the Til Til project and represents a full write down of the mining properties.

- a) On July 30, 2013 the Company issued \$1,010 of convertible unsecured debentures. The maturity date of these debentures is July 30, 2018. The conversion price of the Debentures is CA\$0.10 per share convertible into up to 10,102,114 common shares of the Company. In the month of December 2013 the equivalent of \$ 850 were exercised and converted into 8,500,000 common shares. This resulted in the reclassification of \$518 from long-term debt and \$362 from the equity component of convertible debentures to share capital. At September 30, 2014 the carrying value classified within long-term debt was \$107 and within the equity component of convertible debentures was \$65. The Debentures had been issued in payment of cash advances made in April and May 2013 by Compañía Minera Chañar Blanco
