The accompanying notes form an integral part of these consolidated financial statements.

1) Consolidated statements for the three month period ended June 30, 2016 and 2015:

- a) Revenue for the three month period ended June 30, 2016, decreased over the same period in 2015 due to a decrease in gold ounces sold and to no production during the month of June 2016. Sales decreased to 1,027 ounces compared to 1,392 ounces in the three month period ended June 30, 2015.
- b) Operating expenses for the three months ended June 30, 2016 were \$2,522 compared to \$3,203 for the same period in 2015 which shows a continued effort by Management to reduce costs.
- c) General sales and administrative costs for the three months ended June 30, 2016 were \$544 compared to \$557 for the same period in 2015.

2) Consolidated statements for the nine month period ended June 30, 2016 and 2015:

- a) Revenue for the nine month period ended June 30, 2016 decreased over the same period in 2015 due to a decrease in gold ounces sold and to a month less of production. Sales decreased to 4,433 ounces compared to 6,866 ounces in the same period ended June 30, 2015.

3) Consolidated Cash flow for the nine month period ended June 30, 2016:

Cash generated by the Pimenton Mine decreased due to operational problems and the drop in the price and grade of gold added to the fact that during the month of June 2016 the plant was closed due to a snow storm. The operational problems relate to delays in reaching known and expected ore shoots below the existing levels. Capital expenditure at the Pimenton Mine was \$604 for the nine month period ended June, 2016 (2015 - \$1,332)

4) Consolidated Statement of Financial Position as at June 30, 2016:

As at June 30, 2016 the Company had a negative working capital of \$7,746 (2015—negative \$3,484). The increase of \$4,262 is mainly explained by the reclassification from long term

debt of \$3,000 payable to related parties and new advances for working capital by the same individuals. As noted before, negotiations are taking place to extend this indebtedness.

## Overview

The Company's other major projects are a porphyry copper deposit (the "Pimenton Porphyry") and other projects in various stages of exploration and development in Chile which include "Tordillo", and two limestone deposits "Catedral" and "Cal Norte".

## Financial Highlights

- Loss before income taxes for the nine month period ended June 30, 2016 was \$3,980 compared to a loss of \$ 4,264 in the same period in 2016.

## **Other Highlights**

- Due to a snow storm at the beginning of the month of June 2016, during which approximately 3.10 meters of snow were accumulated at the mine site, production was interrupted and all the miners had to be evacuated. This interruption has caused severe financial problems as with no production no cash was available to pay suppliers and the worker's wages at month end. As no cash was available to clear the road and set up operations, the mine and plant have been closed down until external financing is obtained to cover our debts with suppliers and workers plus working capital to start up operations.
- Management believes that the values of the Pimenton gold mine, the potential porphyry copper deposit, Tordillo exploration and the Catedral/Rino and Cal Norte limestone deposits are not reflected in the Company's market capitalization. The Company will continue its effort to enhance the underlying values of its assets.

Cerro Grande Mining Corporation is a minerals producing, exploration and development company with properties and activities currently focused in Chile.
