- 1) Consolidated statements of (loss) income and other comprehensive (loss) income for the three fiscal month period ended June 30, 2013 and 2012: (Expressed in thousands of US dollars)
 - a) Revenue for the three month period ended June 30, 2013 decreased over the same period in 2012 due to a decrease in gold sales to 1,590 oz compared to 3,997 oz in the three month period ended June 30, 2012. This, in combination with a drop in the gold price to an average closing price on the LME of \$1,414 for the quarter ended June 30, 2013 (2012-\$1,611).
 - b) Operating expenses for the three months ended June 30, 2013 were \$4,384 compared to \$6,460 for the same period in 2012. The decrease of \$2,076 consists of decreased direct costs of \$353; labor cost of \$132; net smelter return of \$285; indirect costs of \$199, of which \$57 related to mine insurance and \$103 related to a measurement and monitoring program. In addition depreciation and amortization decreased by \$70, refining and metallurgical charges decreased by \$39, inventory variation decreased by \$907 and expansion costs decreased by \$91. Costs from services provided by Pimenton to CDM including management, machinery and equipment rent was \$8 (2012 - \$932).
 - c) General and administrative costs for the three months ended June 30, 2013 were \$1,206 compared to \$950 for the same period in 2012. This \$256 increase was due to an increase of \$305 in stock based compensation; an increase in professional fees of \$32; an increase in insurance and other expenses of \$33. This was offset by a reduction in salaries of \$67 and a reduction in overhead expenses of \$47.
 - d) The Company expenses its exploration costs on properties until a NI 43 -101 compliant resource has been established on a property. As a result during the three month period ended June 30, 2013, the Company expensed \$96 (2012 - \$2,008) of exploration costs as follows: La Bella \$nil (2012 - \$45); Bandurrias \$5 (2012 - \$13); Santa Cecilia \$263 (2012 - \$1,864); Tordillo \$75 (2012- \$nil); Catedral \$16 (2012 - \$14) and other \$71 (2012 -\$72).
 - e) Impairment charges in mining properties, plant and equipment for the three month period ended June 30, 2013 were \$2,140 (2012 - \$nil). The decline in metal prices towards the latter half of the third quarter of 2013 was an indicator of potential impairment. The Company performs impairment testing annually and when impairment indicators are present. Impairment testing is performed using value-in-use, which incorporates reasonable estimates of interest rates, metal prices, production based on current estimates of recoverable mineral reserves and mineral resources and future operating cost.
 - f) Other gains and loss for the three months ended June 30, 2013 was a net gain of \$865 and was principally from a conversion of the \$1,568 convertible unsecured debentures due on June 26, 2013 by the holders, Mr. David R.S. Thomson and Mr. Mario Hernandez both Executive Vice Presidents and directors of the Company, which were issued to them on November 15, 2012 and which were due to mature on November 15, 2017 into

As of June 30, 2013, the Company shows a negative working capital of \$2,942 (2012-\$598). This reduction in working capital was principally due to a reduction in accounts receivable of \$1,376 and an increase in payables to related parties consisted principally of cash advances of \$2,818 provided by David Thomson and Mario Hernandez.

The principal reasons for the poor results in the third quarter ended June 30, 2013, compared to the three months ended June 30, 2012, were a reduction in gold ounces produced, a lower head grade of ore into the mill and a reduction in the price of gold. We are working to improve the ore grades into the mill along with cost reductions in the entire organization. These cost reductions will not be completely recognized until the fourth quarter of our fiscal year ended September 30, 2013.

Cerro Grande Mining Corporation is a minerals producing, exploration and development company with properties and activities currently focused in Chile.
